

M. GLORY VIJITHA

Hyderabad, India | +91 9392223004 | vijithaglory4@gmail.com | [GitHub](#) | [LinkedIn](#) | [HackerRank](#)

SUMMARY

Computer Science and Engineering undergraduate with hands-on experience building scalable, production-ready software using Python, Java, and Generative AI. Skilled in developing efficient, reusable solutions through internships, open-source contributions, and independent AI/automation projects. Strong analytical thinking, logical reasoning, and problem-solving ability, with a fast learning curve and clear technical communication — seeking to contribute to scalable SaaS recruitment technology and AI-driven product development.

TECHNICAL SKILLS

Languages: Python, Java, SQL

Software Development: Object-Oriented Programming (OOP), Data Structures & Algorithms, scalable & reusable software design, REST API development

Generative AI / ML: LLM APIs (OpenAI, Gemini), Machine Learning fundamentals, NLP, Prompt Engineering, Streamlit, FastAPI

Automation & APIs: n8n, Playwright, Telegram Bot API, Google Sheets API, Webhooks

Core CS: DBMS, Operating Systems, Computer Networks

Tools: Git, GitHub, VS Code, MySQL, Oracle SQL

Coding Practice: [LeetCode](#) (Python & Java) — Data Structures & Algorithms, HackerRank (Python & SQL)

EXPERIENCE

AI Tools Tester Intern — Expose Trendze · Remote

Mar 2026 – Jun 2026

- Designed and built a two-way task automation system (n8n, Telegram Bot API, Google Sheets API) that synchronized task assignments and completion status in real time, replacing a fully manual tracking process across the team.
- Developed a scalable e-commerce image-processing pipeline (OpenCV, rembg, PIL, NumPy) on Google Colab, automating a previously manual editing workflow.
- Built a Playwright + Telegram Bot API browser-automation tool for real-time monitoring and change detection, reducing the need for manual page checks.

AI Developer Intern — Summer of AI 2025, VISWAM.AI (Swecha Telangana, IIIT Hyderabad) · Remote

May 2025 – Jul 2025

- Built AI-powered chatbot applications in Python using NLP and prompt-engineering techniques to handle varied user query types with context-aware responses.

AI & Data Analytics Intern — Edunet Foundation (Shell Skills4Future) · Remote

Jun 2025 – Jul 2025

- Built Python data-processing workflows across 2 real-world datasets, producing structured reports and visualizations to support data-driven decisions.

PROJECTS

CareerPilot AI — AI Resume Analyzer & ATS Feedback Engine (Python, FastAPI, Streamlit, Gemini API, SQLite)

[GitHub](#)

- Built an ATS-style feedback engine using the Gemini API that scores resumes and flags gaps against a target job description — functionally similar to resume-parsing and candidate-screening features used in recruitment SaaS platforms.
- Implemented job-description matching logic to surface missing skills and generate personalized, actionable improvement suggestions.
- Built a scalable interview-prep module that dynamically generates role-specific technical and HR questions from resume and JD content.

Event-Driven Task Automation Platform — Python, n8n, Telegram Bot API, Google Sheets AP

[GitHub](#)

- Built a fully automated, event-driven two-way pipeline connecting Google Sheets and Telegram — new rows trigger messages, and replies update status/timestamps back in Sheets in real time — replacing a fully manual process.

Sentio — AI Mood Tracking Assistant (Python, Streamlit, NLP, Sentiment Analysis)

[GitHub](#)

- Built an NLP-powered mood-tracking web application with sentiment analysis and interactive trend dashboards.

OPEN SOURCE

GirlScript Summer of Code (GSSoC) 2026

[Profile](#)

- Shipped 9 merged pull requests across documentation, feature enhancements, and bug fixes (1 additional under review); collaborated with maintainers via code review and issue tracking, demonstrating strong teamwork and communication in a distributed, asynchronous environment.

EDUCATION

MVSR Engineering College, Hyderabad — B.E., Computer Science & Engineering, CGPA: 7.56

Sep 2023 – Present

Narayana Junior College, Hyderabad — Class 12 (MPC), 81.2%

2021 – 2023

Hyderabad Sainik School, Rangareddy — Class 10, CGPA: 10

2016 – 2021

CERTIFICATIONS

- Oracle Certified Expert — Database SQL
- Python Certification — Oracle / Cisco
- Deloitte Data Analytics Job Simulation — Forage
- Prompt Engineering for Generative AI — Internshala (93%, Top Performer)
